1. INTRODUCTION

Plastic pollution poses a significant threat to both human livelihood and the environment. Its pervasive presence in various mediums accelerates environmental degradation at an alarming rate. It is imperative for Higher Education Institutions (HEIs) to take proactive measures to educate and advocate for the reduction, reuse, and recycling of plastic, thereby fostering a pollution-free environment for present and future generations.

Objectives:

1. Sensitize staff and students about the detrimental effects of plastic usage on the environment and human health.
2. Educate individuals on practices to avoid, recycle, and re-use plastic.
3. Explore and adopt alternative materials to replace plastic within the campus.
4. Contribute to environmental preservation by actively reducing plastic pollution.

3. IMPLEMENTATION AND MONITORING

1. The policy will be communicated to all stakeholders through official channels and orientation programs.
2. Compliance monitoring will be conducted periodically to ensure adherence to the ban on plastic usage.
3. Feedback mechanisms will be established to solicit suggestions and address any challenges encountered during the implementation process.
4. Regular assessments will be conducted to evaluate the effectiveness of the policy and make necessary adjustments as needed.

4. REVIEW

1. The policy will be subject to periodic review to assess its effectiveness and relevance.
2. Amendments or updates will be made based on emerging trends, technological advancements, and feedback from stakeholders.

By implementing these measures, the institution aims to create a sustainable and eco-friendly campus environment, contributing to the global efforts in combating plastic pollution and preserving our planet for future generations.
